

BUSINESS ANALYST INTERN ASSIGNMENT

Name: Chintala Ramaneswari

College: PRAGATI ENGINEERING COLLEGE

Roll Number: 23A31A4272

Email: chinthalaramaneswari1802@gmail.com

Phone: +916303615626

Please answer the FIVE mandatory questions.

1. Please confirm your consent to sign a bond for 36 months (including a 12-month internship). Submit your assignment if you are comfortable with this bond.

[I understand the terms of the 36-month bond, including the 12-month internship period. I am comfortable with the commitment and willing to sign the bond. I believe this opportunity will help me gain practical industry experience, develop my professional skills, and build a strong foundation for my career. I am ready to contribute to the organization while learning from experienced professionals and growing within the company]

2. Have you received the stipend and CTC details? Please confirm by providing the details here.

[Yes, I have received and reviewed the stipend and CTC details shared by the company. I understand the compensation structure and am comfortable with the terms offered for the internship and subsequent employment. I appreciate the opportunity and consider the learning experience, professional growth, and industry exposure to be equally important factors alongside compensation

Stipend: [15000]

CTC: [8LPA]

]

3. Are you willing to relocate to Gachibowli, Hyderabad?

[Yes, I am willing to relocate to Gachibowli, Hyderabad. I view relocation as an opportunity to gain exposure to a professional work environment, collaborate with experienced teams, and expand my career opportunities. I am adaptable and prepared to move if selected for

the internship. I believe working from the company location will help me learn faster, improve my communication skills, and contribute more effectively to the organization]

4. What motivated you to pursue a career as a business analyst?

[Yes, I am interested in a Business Analyst career because it combines analytical thinking, problem-solving, and communication. I enjoy understanding how systems work, identifying challenges, and finding practical solutions that improve efficiency. During my academic projects, I developed an interest in working with data, gathering requirements, and presenting insights. A Business Analyst acts as a bridge between business needs and technical solutions, which I find both challenging and rewarding. I want to build a career where I can contribute to business growth through data-driven decisions while continuously learning about technology and business processes]

5. Why do you want to join a software testing firm like Frugal Testing?

[I want to join Frugal Testing because it provides an excellent environment to learn about software quality, business processes, and client requirements. Software testing plays a critical role in delivering reliable products, and I believe understanding testing and quality assurance will make me a better Business Analyst. Frugal Testing's focus on innovation, quality, and customer satisfaction aligns with my career goals. As a fresher, I am looking for an organization where I can learn from experienced professionals, gain industry exposure, and develop both technical and business skills while contributing to the company's success]

6. Why are you interested in the Business Analyst internship at Frugal Testing? What skills are you hoping to learn or improve?

[I am interested in the Business Analyst Internship at Frugal Testing because it provides an opportunity to learn how business requirements are analyzed and transformed into effective solutions. I want to improve my skills in data analysis, communication, documentation, and problem-solving while gaining practical industry experience]

7. Share a situation (from college, internship, or group project) where you took initiative to solve a problem or lead a small team.

[During my college project, I noticed that tasks were not clearly assigned among team members, which caused delays. I took the initiative to divide responsibilities, track progress, and coordinate discussions. This helped the team complete the project successfully and on time]

8. Where do you see yourself professionally 5 years from now? What kind of work would you like to be doing?

[In five years, I see myself as a skilled Business Analyst working on challenging projects and helping organizations make data-driven decisions. I would like to work closely with stakeholders, analyze business requirements, and contribute to process improvements and business growth]

9. What is your view on how COVID-19 affected the Indian economy, especially small businesses and the tech sector?

[COVID-19 negatively affected many small businesses due to lockdowns and reduced customer demand. However, it accelerated digital transformation in India, increasing the adoption of remote work, cloud technologies, and online services. The tech sector experienced significant growth and created new opportunities for innovation and employment.]

ARTICLE :

[No, I have not published any blogs or articles yet. However, I have experience preparing project documentation, technical reports, and academic content during my coursework. I am interested in improving my content writing and research skills and look forward to creating professional articles and business-related content in the future]

TECHNICAL KNOWLEDGE

11. Which tools or software (if any) have you used for analysis, research, or documentation (e.g., Excel, Google Sheets, Notion, Figma, JIRA, etc.)?

[I have used Microsoft Excel, Google Sheets, SQL, PowerPoint, and basic documentation tools during my academic projects. Excel and Google Sheets helped me organize and analyze data, while SQL was used for managing and retrieving information from databases. I have also used PowerPoint for presenting project findings and reports. Excel (Pivot Tables, VLOOKUP, Charts), SQL (SELECT, JOIN, GROUP BY), PowerPoint, Google Sheets. I used Excel dashboards and SQL queries during academic projects to analyze and present data effectively.]

12. Have you ever used charts or graphs to present information? If yes, how did it help?

[Yes, I have used charts and graphs in college projects and presentations. Visual representations such as bar charts, pie charts, and line graphs helped simplify complex information and made it easier to identify trends, compare data, and communicate insights effectively. They also improved the clarity and impact of presentations.]

13. Name any book (or online resource) that helped you learn business analysis or decision-making. Why do you admire it?

[One online resource that helped me understand business analysis concepts is Microsoft Learn. It provides practical learning materials on data analysis, business processes, and decision-making. I admire it because the content is well-structured, beginner-friendly, and focused on real-world applications, making it easier to understand and apply concepts.]

14. Have you worked with data (in college or an internship) to give suggestions or improve something? Briefly describe it.

[Yes. During a college project, I worked with student-related data to develop a Student Management System. I analyzed and organized the data to improve record management and reduce manual work. By structuring the information efficiently, the system made it easier to access records, generate reports, and improve overall data accuracy and management.]

ARTICLE :

[NOTA (None of the Above): Strengthening Democratic Choice

Intro:

NOTA, which stands for "None of the Above," is an option available to voters in Indian elections. Introduced by the Election Commission of India in 2013 following a Supreme Court directive, NOTA allows voters to reject all candidates contesting in an election if they feel that none of them are suitable. It provides citizens with a way to express dissatisfaction while still participating in the democratic process.

Importance of NOTA

The introduction of NOTA has strengthened democracy by giving voters greater freedom of choice. Earlier, voters who were unhappy with all candidates often chose not to vote. With NOTA, they can participate in elections and formally register their disapproval. This encourages political parties to nominate better candidates and become more accountable to the public. NOTA also promotes voter awareness and participation. It sends a message that citizens expect honesty, competence, and integrity from political leaders. A higher NOTA count can indicate public dissatisfaction with the available choices and encourage reforms in candidate selection.

Limitations

Despite its significance, NOTA has certain limitations. Even if NOTA receives the highest number of votes, the candidate with the next highest valid votes is still declared the winner. Therefore, NOTA currently acts more as a symbolic expression of voter opinion rather than directly affecting election results. Many experts believe that stronger provisions could make NOTA more impactful in the future.

Ending:

NOTA is an important feature of India's democratic system because it empowers voters to express their dissatisfaction with the available candidates. It promotes transparency, accountability, and active participation in elections. While it does not currently influence election outcomes directly, it serves as a valuable tool for strengthening democracy and encouraging political parties to field better candidates. As voter awareness grows, NOTA can continue to play an important role in improving the quality of democratic governance.

SWOT ANALYSIS

[Strengths, Weaknesses, Opportunities, Threats]

[Frugal Testing's strengths include its expertise in software testing, quality assurance services, and customer-focused approach, which help deliver reliable software solutions.

However, the company may face challenges such as lower brand recognition compared to larger IT firms and a narrower range of services. There are significant opportunities for growth due to the increasing demand for software testing, automation, cloud technologies, and cybersecurity services. At the same time, Frugal Testing faces threats from strong competition in the IT industry, rapid technological changes, and economic conditions that may impact technology spending. Overall, the company is well-positioned to benefit from the growing digital transformation market

Strengths

- Specialized QA and Software Testing expertise
- Global client presence
- Strong automation testing focus

Weaknesses

- Smaller brand visibility compared to TCS, Infosys, Accenture
- Service portfolio mainly focused on testing

Opportunities

- Growing AI Testing market
- Increased cloud adoption
- Rising cybersecurity testing demand

Threats

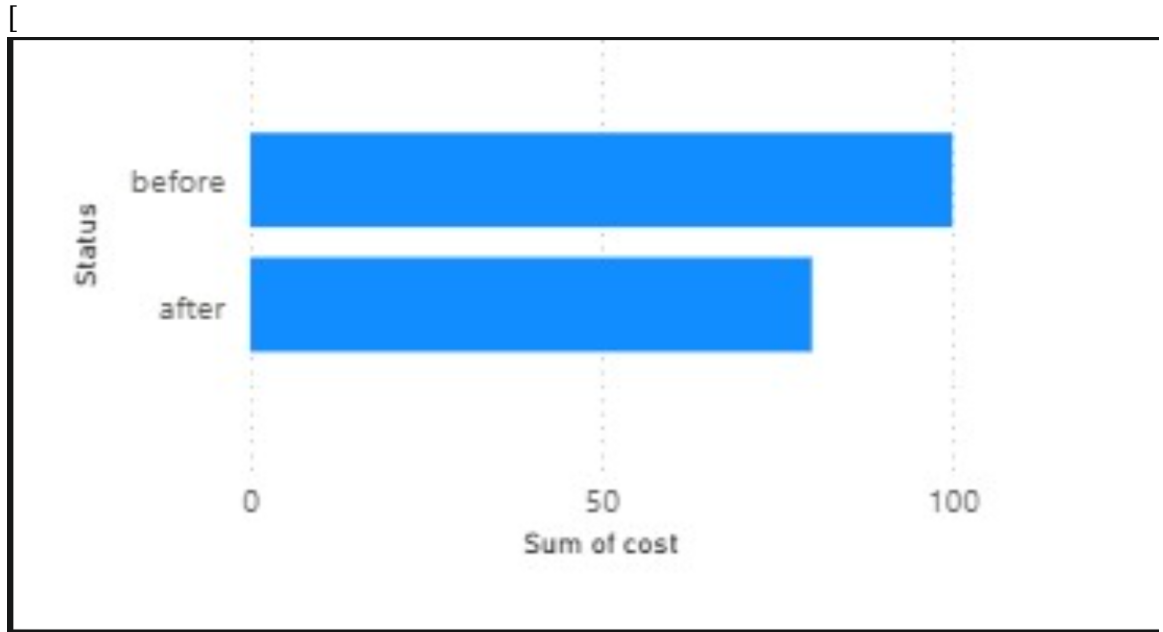

- AI-driven testing automation reducing manual testing demand
- Strong competition from large IT service providers

This immediately sounds researched.

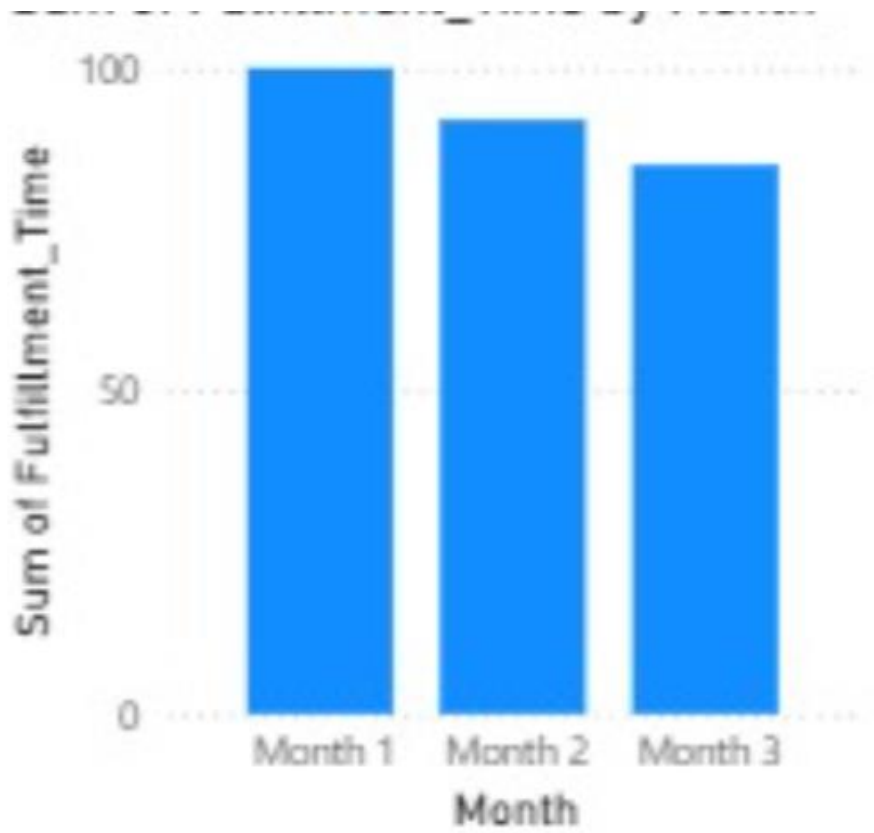

]

CHARTS

1. Bar Chart- Inventory costs before vs after

2. Line Chart- Order fulfillment time over 3 months

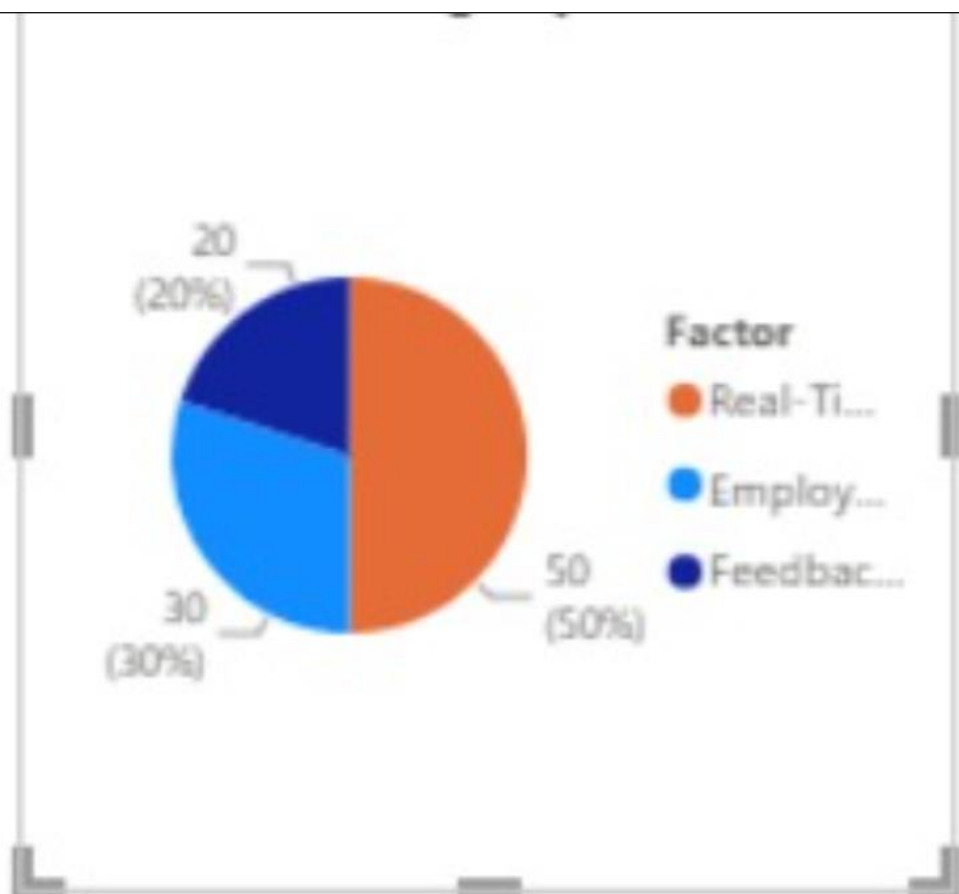

3. Pie Chart- Stock wastage reduction distribution
